3. Transitional Age Youth
4. Older Adults

REVIEW OF FOCUS AREAS & LOOKING AHEAD

Strategies and Activities

Standardize intake and screening protocols across care settings

- **Create a curated list of screening tools and protocols**
- **Identify and implement a standardized intake form and protocol across care systems**
- Conduct cross disciplinary training to establish common approaches
- Identify performance outcome measures

Standardize transition of care protocols between care systems and levels of care

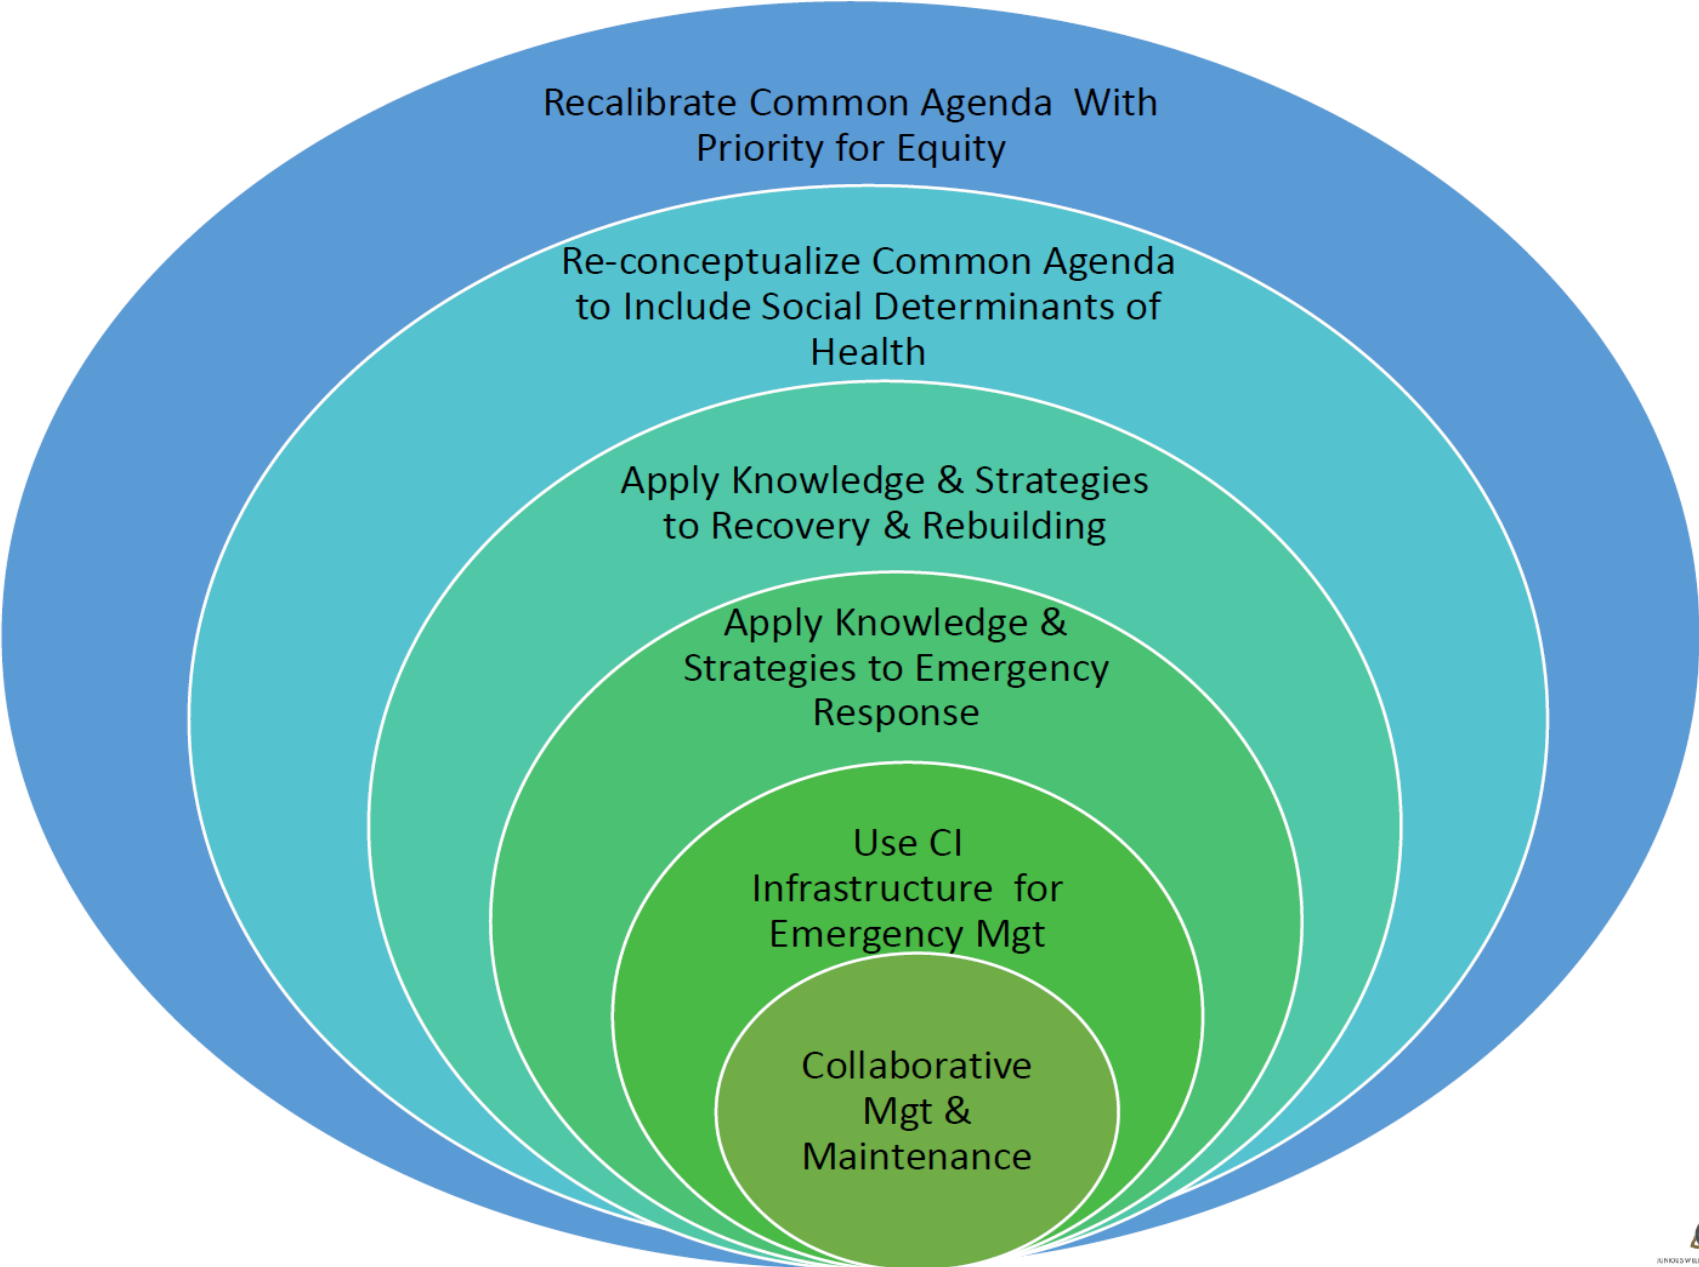

- Identify and document break-down areas during care transitions among hospitals, clinics, and providers
- Develop recommendations for hospitals, providers, etc. to adopt to streamline and improve care transitions
- **Create and pilot with a sub-set of organizations a universal data sharing agreement**
- Develop cross organizational workflows and trainings to establish more streamlined care transitions

Expand BH provider network and expertise of MH and SUD workforce

- Explore performance-based contracting with providers, including community defined values and metrics
- Explore development of a public/private provider network
- Streamline the process of becoming an in-network provider

A Framework: Looking Ahead

Time of crisis increase the spheres of possible work for collective impact initiatives
